EDUCATION

Graphic Era Hill University

Masters Of Computer Application - CGPA - 8.10

2023- 2025

Bhimtal, Nainital

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript

Web Development: Next.js, React.js, Tailwind CSS, HTML, CSS

Tools/Framework: Git, Streamlit, VS Code, Android Studio, Clerk Auth, Drizzle ORM

Database: MySQL, PostgreSQL

Others: Machine Learning, REST API

INTERNSHIP

Cyborgwave 📁

Web Developer Intern

Jul 2024 - Aug 2024

Bhimtal, Uttarakhand

- Developed a responsive landing page inspired by DoorDash to improve user interface (UI) and user experience (UX) design skills.
- Built a functional clone of ExpressVPN to strengthen frontend and backend web development skills.
- Designed and deployed a personal portfolio website using HTML, CSS, and JavaScript to showcase technical skills, projects, and professional experience.

PROJECTS

Mock.Ai 🐙 | [React](#), [Next.js](#), [Clerk Authentication](#), [Drizzle ORM](#), [Gemini AI](#)

04 2025

- Developed an AI-driven mock interview platform to simulate real interview scenarios and enhance candidate preparation.
- Integrated Clerk authentication for secure user sign-up and login, improving data security and enhance user experience.
- Optimized database queries with Drizzle ORM, reducing response time by 40 percent and ensuring scalable data handling.
- Built a responsive, SEO-friendly frontend with Next.js, reducing website load time by 35 percent and improving Core Web Vitals.

Multiple Disease Prediction System 🐙 | [Python](#), [Machine Learning](#), [Streamlit](#)

07 2024

- Built a web-based machine learning application that predicts the likelihood of Heart Disease, Diabetes, and Parkinson's Disease based on user input.
- Trained classification models using healthcare datasets from Kaggle to provide accurate disease predictions based on user input.
- Developed an intuitive UI using Streamlit, allowing users to input symptoms and receive instant predictions.

Movie Recommendation Application 🐙 | [Android Studio \(Java\)](#), [Flask API](#), [Machine Learning](#), **01 2025**

- Developed a personalized Movie Recommendation Application using Android Studio for frontend and Flask REST API for backend integrations.
- Implemented a machine learning-based recommendation engine using Kaggle movie datasets to suggest movies based on user preferences.
- Optimized API response time and reduced data processing latency by 40 percent, ensuring a seamless user experience.
